The Gas Wook System

Charles' design

for the compression and delivery

is an outgrowth of the

Oxygen Therapy book designed

by T. L. Andretta and L. Coffey

Pat. D. T.

selecting

compresses rigid, collapsible

and semi-rigid

hoods, together with seals

gas circulating, and gas

conditioning systems.

Each hood includes

provision for smooth,
Dear, enlightened vision, consisting of indescribable fiction, visual surface.

One sheet is rigid, one collapsible with rigid face visual segment.

The seals employed include a folding neck seal of silicone rubber, elastic disintegrable sheet, and an neck seal.
